

EXPERIMENT 5

NAME: ANISHA G

ROLL NO: 240701041

Conduct task analysis for an app (e.g., online shopping) and document user flows. Create corresponding wireframes using Lucidchart.

AIM:

To understand and document the steps a user takes to complete the main tasks within an online shopping app.

PROCEDURE:

USER FLOW CONTENT (Online Shopping App)

1. Entry into the App

- User opens the application
- User chooses between:
 - Login
 - Sign Up

Login / Sign Up Flow

- Enter credentials (email/username & password)
- If new user → Sign up with required details
- Successful authentication → Redirect to Home Screen

2. Browsing Products

- Home Screen displays product categories
- User selects a category or browses products
- Product list is shown
- User selects a product to view details

Flow:

Home Screen → Select Products → Product Details

3. Adding Products to Cart

- User views product details
- Clicks on **Add to Cart**

Flow:

Product Details → Add to Cart → Cart

4. Cart & Checkout Process

- User opens the cart
- Reviews selected items
- Clicks on **Proceed to Buy**

Flow:

Cart → Proceed to Buy

5. Address Verification (Decision Point)

- System checks: **“Is address added?”**

If NO

- User is prompted to add shipping address
- After adding → Continue to checkout

If YES

- Proceed directly to payment

6. Payment Process

- User selects a **Payment Option**
- Completes payment

Decision: Payment Success?

If NO

- Retry payment
- Return to payment options

If YES

- Order is successfully placed

7. Order Confirmation & Tracking

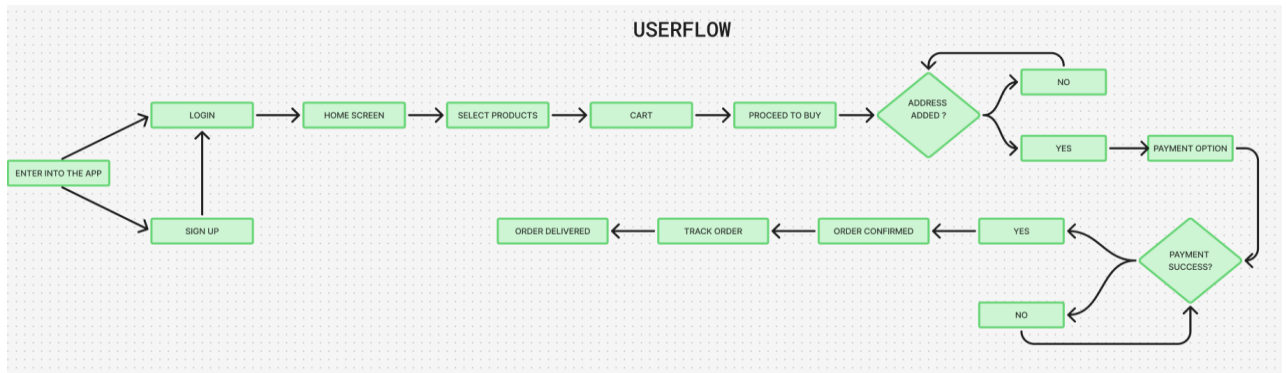

- Order is confirmed
- User can track the order

Flow:

Order Confirmed → Track Order → Order Delivered

8. Final Outcome

- Product is delivered to the user
