

UID EXPERIMENT 9

NAME: ANISHA G

ROLL NO: 240701041

Create storyboards to represent the user flow for a mobile app (e.g., food delivery app) using Balsamiq.

AIM:

The aim is to create storyboards representing the user flow for a mobile E-commerce app using Balsamiq.

PROCEDURE:

1. Tool Used: Balsamiq Wireframes (<https://balsamiq.com>)
2. I created a new project and added mobile screens to simulate the user's shopping experience from start to finish.
3. Each screen represents a key step in the product browsing and purchase process.
4. UI components like buttons, text fields, dropdowns, images, and icons were selected from Balsamiq's built-in library.
5. All wireframes were designed to be simple, clean, and focused on user interaction and flow.

User Flow :

1. **Homepage** – Users can browse featured products, search for items, and navigate to different categories.

- 2. Categories Screen** – Displays various product categories such as Electronics, Fashion, Home, etc.
- 3. Product List Screen** – Shows a list of products within a selected category, with image, name, price, and “Add to Cart” button.
- 4. Product Details Screen** – Detailed view of a single product with description, images, price, and “Add to Cart” button.
- 5. Checkout Screen** – Shows the cart with total price, delivery address input, and a button to proceed.
- 6. Payment Confirmation Screen** – Displays payment options and a confirmation message after successful payment.

Homepage

- **Components:**

- Search bar
- Banner/Carousel for offers
- Navigation buttons to categories
- Featured products with thumbnail, price, and "Add to Cart".

- **Purpose:**

- Starting point for exploring and engaging with the app’s product offerings

Categories Screen

- **Components:**

- Grid or list view of categories (e.g., Electronics, Fashion, Groceries)

- Icons/images representing each category
- **Purpose:**
 - Help users easily filter products based on interest.

Product List Screen

- **Components:**
 - Scrollable list of products
 - Product image, name, price
 - “Add to Cart” button for each product
- **Purpose:**
 - View and select products within a specific category.

Product Details Screen

- **Components:**
 - Product image gallery
 - Title, price, ratings
 - Description and specifications
 - “Add to Cart” button
- **Purpose:**
 - Provide full information about a product to aid in purchase decisions.

Checkout Screen

- **Components:**

- List of items in cart with price breakdown
 - Input fields for delivery address
 - “Proceed to Payment” button
- **Purpose:**

Let users review their order and enter delivery details.

Payment Confirmation Screen

- **Components:**
 - Radio buttons for payment methods (UPI, Credit Card, COD)
 - Order summary and total cost
 - “Pay Now” or “Confirm Payment” button
 - Confirmation message (e.g., “Payment Successful! Your order will arrive in 3- 5 days.”)
- **Purpose:**

Final confirmation step that assures the user the transaction is complete.

WIREFRAMES:

STORYBOARD:

SHIEN - ONLINE CLOTHING APP

SCENARIO #1 -- INITIAL IDEA

I want a fashion app where I can easily shop for trendy clothes at affordable prices, all in one place.

Great idea! We'll create an app that offers the latest fashion trends with a wide variety of clothes, accessories, and styles.

SCENARIO #2 -- FEATURES

Can I filter clothes by size, color, style and price? I also want to save my favourite items.

Absolutely! We'll include advanced filters, wishlists, flash sales and personalized recommendation based on your preferences.

SCENARIO #3 -- USER INTERFACE

How will the app look? I want it to feel stylish but easy to use.

We'll design a clean, modern UI with fashion focused visuals, smooth navigation, clear product images, and easy checkout steps.

SCENARIO #4 -- REVIEWS

Can I see reviews and know how the clothes will fit before ordering?

Yes! We'll include customer reviews, size guides, real user photos, and delivery tracking so you feel confident about your purchase.

SCENARIO #5 -- SECURITY

Is my payment and personal data safe?

Definitely! We'll use secure payment gateways, encrypted transactions and protect user data following privacy standards.

SCENARIO #6 -- TESTING & LAUNCH

How will you ensure the app works smoothly before launch?

We'll conduct usability testing with real users, fix issues, improve performance and then launch a polished app.
