

EXPERIMENT 6

NAME: ANISHA G

ROLL NO: 240701041

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface using Axure RP.

AIM:

The aim is to demonstrate the lifecycle stages of UI design via the RAD model and develop a small interactive interface employing Axure RP.

PROCEDURE:

Simulating the Lifecycle Stages for UI Design Using the RAD Model

RAD Model (Rapid Application Development): The RAD model emphasizes quick development and iteration. It consists of the following phases:

1. Requirements Planning:

- Gather initial requirements and identify key features of the UI.
- Engage stakeholders to understand their needs and expectations.

2. User Design:

- Create initial prototypes and wireframes.
- Conduct user feedback sessions to refine the designs.
- Use tools like Axure RP to develop interactive prototypes.

3. Construction:

- Develop the actual UI based on the refined designs.

- Perform iterative testing and feedback cycles.

4. Cutover:

- Deploy the final UI.
- Conduct user training and support.

Axure RP Interactive Interface Development

Phase 1: Requirements Planning

App Description:

The **Spotify Music Application** is a digital music streaming platform that allows users to listen to songs, explore playlists, and subscribe to premium plans for enhanced features like offline downloads and ad-free listening.

Identified Pages:

1. Front Page (Welcome Page)
2. Login Page
3. Account Selection Page
4. Songs / Home Page
5. Subscription Page
6. Checkout Page
7. Payment Page
8. Summary Page
9. Payment Success Page

User Actions:

- User can sign up
- User can log in
- User can select account
- User can browse songs
- User can play songs
- User can like songs
- User can download songs
- User can subscribe to premium
- User can select payment method
- User can complete payment

Requirements Document:

1. The system should display a welcome page.
2. The system should allow users to log in using multiple methods.
3. The system should allow account selection.
4. The system should display songs and categories.
5. The system should allow music playback controls.
6. The system should allow premium subscription.
7. The system should display subscription plans.
8. The system should provide checkout details.
9. The system should allow multiple payment methods.

10. The system should display payment summary.
11. The system should confirm successful payment.

Phase 2: User Design

Tools Used:

- Figma – UI Design
- Axure – Wireframing
- Canva – UI Elements

Wireframes Designed

1. Front Page (Welcome Screen)

- Displays Spotify logo
- Tagline: “Millions of songs. Free on Spotify.”
- Buttons:
 - Sign Up
 - Log In

Purpose: Entry point for users.

2. Login Page

- Login options:
 - Email
 - Phone Number

- Google
- Facebook
- Sign-up option

Purpose: User authentication.

3. Account Selection Page

- Displays available accounts
- User selects one account
- Continue button

Purpose: Select user profile.

4. Songs / Home Page

- Categories: All, Music, Podcasts
- Playlist suggestions
- Artists and trending songs
- Bottom navigation:
 - Home
 - Search
 - Downloads
 - Premium
 - Create Playlist
- Music player controls

Purpose: Main music browsing interface.

5. Subscription Page

- Displays premium plans
- Offer details (e.g., 3 months for \$49)
- Features:
 - Ad-free music
 - Offline downloads
 - High-quality audio
- CTA: “Try Premium”

Purpose: Encourage users to subscribe.

6. Checkout Page

- Displays selected plan
- Shows price and duration
- Billing details:
 - Current payment
 - Next billing cycle
- Option: Change Plan

Purpose: Confirm subscription before payment.

7. Payment Page

- Payment options:
 - UPI (GPay, PhonePe, Paytm)
 - Credit/Debit Card
- Terms and conditions

Purpose: Complete payment securely.

8. Summary Page

- Displays selected plan
- Total amount
- Billing details
- “Pay Now” button
- Change plan option

Purpose: Final verification before payment.

9. Payment Success Page

- Success icon
- Message: “Payment Successful”
- Confirmation text
- Visual animation

Purpose: Confirm successful transaction.

Phase 3: Construction

Dynamic Elements:

- Page navigation
- Music playback controls
- Subscription plan selection
- Payment method selection
- Success confirmation screen
- Bottom navigation interaction

Testing:

- Tested login system
- Tested account selection
- Tested music playback
- Tested subscription flow
- Tested payment process
- Verified summary and success pages
- UI improvements applied

Phase 4: Cutover

Finalization:

- All 9 screens designed
- Navigation flow completed
- Payment system integrated

- Prototype finalized

User Support:

- Easy login and signup
- Smooth music experience
- Simple subscription process
- Future support features can be added

**Millions of songs.
